The Brother Nathanael Foundation envisions an America that is Christian in its consciousness and wholesome in its culture.

The Foundation will support work that enables individuals and institutions to access the resources needed to take America back from the forces that are destroying our nation.

Whether its litigating for Christian symbols in the public square, creating and helping media outlets with factual news, or publishing books that will bypass the censors who fear truthful content, the Brother Nathanael Foundation will be there.

Come, let's work together to build a Christian America!
